

Individual Reflection 4

Julia Böckert

What do I want to learn or understand better?

I want to understand how to make the most of using a base-template and get really familiar with HTML in a context when we're using Jinja 2.

How can I help someone else, or the entire team, to learn something new?

I can share what I've learned from completing the user story concerning templates and routing! I feel confident after doing some research and managing on my own. I'm excited to share with those who would like to learn.

What is my contribution towards the team's use of Scrum?

I have completed one full user story and thus I've contributed to completing the sprint and showing that we can work at this velocity.

What is my contribution towards the team's deliveries?

Same as above, completed (together with other members) the base-template and done routing for the different pages.
